OBJECTIVE

To find fulfilling and challenging projects requiring a Front End Web Developer which allow me the ability to work remotely with a great team or a person who is comfortable and skilled at using available social networking tools to communicate and get the job done.

TECHNICAL PROFICIENCY

Preferred Languages:

JavaScript, CoffeeScript, Ruby, RoR, PHP, MySql, CSS, Sass

Preferred Operating Systems:

Mac OS X, Redhat Linux

Commonly used Applications:

TextMate, vi, git, Photoshop, Chrome, Safari, FireFox

EXPERIENCE

OpenFeint

Javascript Programmer

August 2010 - August 2011

- Worked on a cutting edge project using OOP JavaScript in a native mobile app being served data by RoR
- Improved the applications reliability by using Jasmine, a Javascript Test Driven Development Suite
- Simplified maintenance by refactoring existing JavaScript into CoffeeScript
- Lead Engineer on a project with our developers working remotely in Beijing

Radius Marketing

Senior User Interface Developer

July 2009 - July 2010

- Rebuilt an unstable front-end improving its speed, reliability, maintainability and usability
- Built the front-end using a custom PHP MVC framework where none existed before
- Created wireframes, proposed, designed and built new features and interfaces
- Increased production by creating reusable interface objects such as modal dialogs
- Researched and built a scheduling interface which exceeded the client expectations
- Convinced the team to switch to JSON rather than XML

Martini Media Network

Lead Front-end Developer

August 2008 - May 2009

- Lead for the front-end of a multi-blog Ruby on Rails site from pre-planning to post

production

- Created wireframes for production clarity on all the needed features and functions
- Transitioned from working mainly in PHP environments for a decade to a Rails

Delamina / Gizmo Creative

Contract Developer/ Telecommuter

February 2008 - August 2008

- Responsible for completing an abandoned front-end PHP MVC Ajax commerce site
- Improved the performance of the web site resulting in shorter page load times
- Helped improve the usability and intuitiveness of the shopping cart
- Assured Quality through bug tracking, testing and debugging throughout production
- Themed a WordPress Blog that matched the look & feel of the shopping cart web site

Yahoo! Groups

Web Developer

July 2006 - February 2008

- Played a key role in modernizing the front-end of an outdated App
- Created an scheduling interface using AJAX
- Built a very profitable custom reusable page template for advertisers
- Built the majority of the form interfaces for Yahoo! Groups Beta

Resolve Digital

Senior Web Developer

May 2002 - May 2005

- Lead Web Developer for Virtual company
- Technical contact for clients
- Helped the company grow year over year

EDUCATION

San Francisco State University

- Currently enrolled part time in night classes working towards a Bachelors in Computer Science
